

Barrister Announces Significant Retail Project Completion

HAMMOND, LA – February 20, 2019 – Barrister Global Services Network, Inc. (“Barrister”), the leading woman-owned technology services provider, announced completion of a significant retail project.

Debra Bowers, President and CEO, commented, "One of Barrister's channel partners engaged Barrister to provide logistics and field service delivery for over 400 locations throughout the USA. Barrister was responsible for building a repair kit in its depot, shipping the kits to forward stocking location, coordinating customer engineers to meet the kit and make it to site inside of a two-hour window. Barrister exceeded the retailer's expectations in both on time performance and in project management. Our robust service management tool allows us real time reporting allowing for complete transparency. We remain committed to the Channel and are experiencing unprecedented growth in the marketplace. We credit this growth to our outstanding delivery results. We have invested significantly in the customer experience. We have vastly improved operating efficiencies and implemented process improvements that directly impact the end users service experience. We have committed our entire organization to our transformation of providing predictable and repeatable service nationwide."

Stacey Powell, Barrister COO, added, "We ended 2018 with the award of several significant contracts. Many of these contracts are in the retail sector. We have the systems, people and processes necessary to provide best in class service delivery. We continue to make significant investments in our field delivery organization.
